

Xingyu Zhou

| | |
|-------------------------|--|
| CONTACT INFORMATION | <p>The Ohio State University 661 Dreese Lab, 2015 Neil Avenue, Columbus, OH 43210 Website: https://xingyuzhou.org/ Email: zhou.2055@osu.edu Phone: (614) 620-9849</p> |
| RESEARCH INTERESTS | <p>Cloud computing, data centers, optimization, applied probability, stochastic networks, signal processing</p> |
| EDUCATION | <p>The Ohio State University, Columbus, Ohio Ph.D., Electrical and Computer Engineering, 2015 – Advisors: Prof. Ness Shroff</p> <p>Tsinghua University, Beijing, China M.S., Electrical Engineering, 2015 Advisor: Prof. Wei Chen</p> <p>BUPT, Beijing, China B.S., Electrical Engineering, 2012 (Ranking: Top 1) Thesis advisor: Prof. Dongming Yuan</p> |
| HONERS AND AWARDS | <p>Student Travel Grant, ACM Sigmetrics, 2018</p> <p>Excellent Dissertation Award, Chinese Institute of Electronics, 2016</p> <p>Outstanding Graduate Award of Beijing city, 2012 and 2015</p> <p>Outstanding Graduate Award, BUPT and Tsinghua University, 2012, 2015</p> <p>Distinguished Dissertation Award, BUPT and Tsinghua University, 2012, 2015</p> <p>Academic Rising Star Award, Electrical Engineering, Tsinghua University, 2015</p> <p>“The December 9th” Scholarship, Tsinghua University, 2014</p> <p>National Scholarship, Ministry of Education, China, 2011 and 2014</p> <p>HNA (HaiNan Airlines) Academic Excellence Scholarship, BUPT, 2011</p> <p>First prize in National Undergraduate Electronic Design Contest, 2011</p> <p>First prize in National “Freescall Cup” Intelligent Car Competition, 2011</p> |
| PREPRINT | <p>Xingyu Zhou, Jian Tan and Ness Shroff, “Heavy-traffic Delay Optimality in Pull-based Load Balancing Systems: Necessary and Sufficient Conditions,” https://arxiv.org/abs/1808.06911.</p> |
| JOURNAL PUBLICATIONS | <p>J9. Xingyu Zhou, Jian Tan and Ness Shroff, “Flexible load balancing with multi-dimensional state-space collapse: Throughput and heavy-traffic delay optimality,” to appear in <i>Performance Evaluation</i>, Elsevier.</p> <p>J8. Xingyu Zhou*, Fei Wu*, Jian Tan, Kannan Srinivasan, and Ness Shroff, “Degree of queue imbalance: Overcoming the limitation of heavy-traffic delay optimality in load balancing systems,” <i>Proceedings of the ACM on Measurement and Analysis of Computing Systems (POMACS)</i>, vol. 2, Article. 21, Mar. 2018. https://doi.acm.org/10.1145/3179424 (*co-primary authors)</p> <p>J7. Xingyu Zhou, Fei Wu, Jian Tan, Yin Sun, and Ness Shroff, “Designing low-complexity heavy-traffic delay-optimal load balancing schemes: Theory to algorithms,” <i>Proceedings of the ACM on Measurement and Analysis of Computing Systems (POMACS)</i>, vol. 1, Article. 39, Dec. 2017. https://doi.acm.org/10.1145/3154498</p> |

CONFERENCE
PUBLICATIONS

J6. Xingyu Zhou, Bo Bai, Wei Chen, "Antenna selection in energy efficient MIMO systems: A survey," *China Communications*, vol. 12, pp. 162-173, Sep. 2015. <https://doi.org/10.1109/CC.2015.7275254> (**Invited paper**)

J5. Xingyu Zhou, Bo Bai, and Wei Chen, "Greedy relay antenna selection for sum rate maximization in amplify-and-forward MIMO two-way relay channels under a holistic power model," *IEEE Communications Letters*, vol. 19, pp. 1648-1651, Jun. 2015. <https://doi.org/10.1109/LCOMM.2015.2449313>

J4. Tong Tian, Xingyu Zhou, Bo Bai, and Wei Chen, "How many antennas should be activated in keyhole channels under a holistic power model," *IEEE Communications Letters*, vol. 19, pp. 981-984, Apr. 2015. <https://doi.org/10.1109/LCOMM.2015.2418762>

J3. Xingyu Zhou, Bo Bai, and Wei Chen, "Iterative antenna selection for decode-and-forward MIMO relay systems under a holistic power model," *IEEE Communications Letters*, vol. 18, pp. 2237-2240, Dec. 2014. <https://doi.org/10.1109/LCOMM.2014.2366091>

J2. Xingyu Zhou, Bo Bai, and Wei Chen, "A low complexity energy efficiency maximization method for multiuser amplify-and-forward MIMO relay systems with a holistic power model," *IEEE Communications Letters*, vol. 18, pp. 1371-1374, Aug. 2014. <https://doi.org/10.1109/LCOMM.2014.2329863>

J1. Xingyu Zhou, Bo Bai, and Wei Chen, "Iterative antenna selection for multi-stream MIMO under a holistic power model," *IEEE Wireless Communications Letters*, vol. 3, pp. 82-85, Dec. 2013. <https://doi.org/10.1109/WCL.2013.111713.130754>

C7. Xingyu Zhou, Jian Tan and Ness Shroff, "Flexible load balancing with multi-dimensional state-space collapse: Throughput and heavy-traffic delay optimality," to appear in *Proc. International Symposium on Computer Performance, Modeling, Measurements and Evaluation (IFIP Performance)*, Toulouse, France, Dec. 2018.

C6. Xingyu Zhou*, Fei Wu*, Jian Tan, Kannan Srinivasan, and Ness Shroff, "Degree of queue imbalance: Overcoming the limitation of heavy-traffic delay optimality in load balancing systems," in *Proc. ACM SIGMETRICS*, Irvine, California, USA, Jun. 2018. <https://doi.acm.org/10.1145/3219617.3219665> (*co-primary authors)

C5. Xingyu Zhou, Fei Wu, Jian Tan, Yin Sun, and Ness Shroff, "Designing low-complexity heavy-traffic delay-optimal load balancing schemes: Theory to algorithms," in *Proc. ACM SIGMETRICS*, Irvine, California, USA, Jun. 2018. <https://doi.acm.org/10.1145/3219617.3219670>

C4. Xingyu Zhou, Bo Bai, and Wei Chen, "Energy efficient relay antenna selection for AF MIMO two-way relay channels," in *Proc. IEEE International Conference on Communications (ICC)*, London, UK, Jun. 2015. <https://doi.org/10.1109/ICC.2015.7249063>

C3. Xingyu Zhou, Bo Bai, Wei Chen and Yuxing Han, "On energy efficiency maximization of AF MIMO relay systems with antenna selection," in *Proc. IEEE Global Conference on Signal and Information Processing (GlobalSIP)*, Atlanta, Georgia, USA, Dec. 2014. <https://doi.org/10.1109/GlobalSIP.2014.7032084> (**Invited paper**)

C2. Xingyu Zhou, Bo Bai, Wei Chen and Yuxing Han, "Energy efficient transmission for DF MIMO relay systems with antenna selection," in *Proc. IEEE Global Conference on Signal and Information Processing (GlobalSIP)*, Atlanta, Georgia, USA, Dec. 2014. <https://doi.org/10.1109/GlobalSIP.2014.7032097>
